

**LOAD MANAGEMENT AGREEMENT  
DUAL FUEL HEAT**

The Water and Light Department will give a special discount on your utility bill for participating in our load management program. **The rates and discounts will be reviewed and open to change annually.**

The control time and length of control depend on the current system demand. Control could occur whenever the system demand reaches the monthly peak limit.

**DUAL FUEL HEAT**

- Off-peak rate plus the Monthly Purchase Power Adjustment
- Electric heat must be the primary heat source.
- The electric consumption must be recorded on a separate meter mounted on the outside of the building.
- The owner is responsible for the meter installation and any necessary automatic switching equipment, contactors, etc.
- Allowable types of dual fuel heat: Electric Plenum Heat with Gas or Oil Backup; Electric Baseboard Heat with Gas or Oil Backup; Electric Forced Air Heat with Gas or Oil Backup; Electric radiant heat with Gas or Oil backup; Electric Boiler Heat with Gas or Oil Backup. Propane is not listed as a backup heat source because in nearly all cases City Code does not allow propane tank installations for permanent heating.

The owner or owner's electrician will install the Load Management Terminal in new home construction. Load Management Terminals will not be distributed to electricians unless a customer signed Load Management Agreement is on file at the Distribution Service Center.

The Water & Light Department will own and operate the load management equipment on the customer's property. The customer must allow the Water & Light Department on the customer's premises to install, maintain, relocate, repair, or remove the load management equipment.

The customer gives the Water and Light Department the authority to temporarily switch off the electricity to the appliances specified below:

Please Check the Electric Appliance(s) You Would like Controlled by Our Load Management System.

**Dual Fuel:**

- \_\_\_\_\_ (4) Electric Plenum Heat with Gas or Oil Backup List backup heat source: \_\_\_\_\_
- \_\_\_\_\_ (5) Electric Baseboard with Gas or Oil Backup List backup heat source: \_\_\_\_\_
- \_\_\_\_\_ (6) Electric Forced Air with Gas or Oil Backup List backup heat source: \_\_\_\_\_
- \_\_\_\_\_ (7) Electric Radiant Heat with Gas or Oil Backup List backup heat source: \_\_\_\_\_
- \_\_\_\_\_ (8) Electric Boiler Heat with Gas or Oil Backup List backup heat source: \_\_\_\_\_

The Water & Light Department will give a special discount on the customer's utility bill. The Water & Light Department will let the customer know what this discount is as they are reviewed and/or changed annually.

The customer will inspect the load management equipment periodically to make sure it is working properly.

The customer must give the Water & Light Department a 30-day written notice if they want their load management equipment removed. If the customer vacates, sells, or disposes of their property, they shall also give written notice to the Water & Light Department. If the customer fails to give notice they will reimburse and hold the utility harmless for any expenses incurred with the operation, maintenance, or removal of the load management equipment.

The customer agrees that the Water & Light Department will not be held liable for any economic loss due to malfunction of the load management equipment or any power interruptions.

**CONSENT OF THE CUSTOMER**

I have read and understand the load management agreement, guidelines, and incentives; therefore, I consent to this agreement.
