

**LOAD MANAGEMENT AGREEMENT
SEASONAL LOAD CONTROL**

The Water and Light Department will give a special discount on your utility bill for participating in our load management program. ***The rates and discounts will be reviewed and open to change annually.***

The control time and length of control depend on the current system demand. Control could occur whenever the system demand reaches the monthly peak limit.

SEASONAL LOAD CONTROL

- All winter heating season energy is at the off-peak rate and the Monthly Purchase Power Adjustment. All summer cooling season energy is at the customer's general rate and the Monthly Purchase Power Adjustment
- The electric consumption must be recorded on a separate meter mounted on the outside of the building.
- The owner is responsible for the meter installation and any necessary automatic switching equipment, contactors, etc.
- Definition: An Electric Air or Ground Source Heat Pump which provides primary winter season heating with automatic fossil fuel backup which is capable of providing primary replacement heating for the full duration of an off-peak load control period, and that the heat pump system is connected to and capable of being controlled by the Commission's load management system in both heating and cooling mode. The heat pump shall qualify for a \$6 per month Air Conditioning load control credit for the months of June through September provided that the heat pump system is connected to and capable of being controlled by the load management system.

The owner or owner's electrician will install the Load Management Terminal in new home construction. Load Management Terminals will not be distributed to electricians unless a customer signed Load Management Agreement is on file at the Distribution Service Center.

The Water & Light Department will own and operate the load management equipment on the customer's property. The customer must allow the Water & Light Department on the customer's premises to install, maintain, relocate, repair, or remove the load management equipment.

The customer gives the Water and Light Department the authority to temporarily switch off the electricity to the appliances specified below:

Please Check the Electric Appliances You Would like Controlled by Our Load Management System.

Seasonal Load Control

- _____ (20) Electric Air Source Heat Pump as dual fuel with summer control
List backup heat source: _____
- _____ (21) Electric Air Source Heat Pump as dual fuel without summer control
List backup heat source: _____
- _____ (22) Electric Ground Source Heat Pump as dual fuel with summer control
List backup heat source: _____
- _____ (23) Electric Ground Source Heat Pump as dual fuel without summer control
List backup heat source: _____

The Water & Light Department will give a special discount on the customer's utility bill. The Water & Light Department will let the customer know what this discount is as they are reviewed and/or changed annually.

The customer will inspect the load management equipment periodically to make sure it is working properly.

The customer must give the Water & Light Department a 30-day written notice if they want their load management equipment removed. If the customer vacates, sells, or disposes of their property, they shall also give written notice to the Water & Light Department. If the customer fails to give notice they will reimburse and hold the utility harmless for any expenses incurred with the operation, maintenance, or removal of the load management equipment.

The customer agrees that the Water & Light Department will not be held liable for any economic loss due to malfunction of the load management equipment or any power interruptions.

CONSENT OF THE CUSTOMER
