

# CLEAN ENERGY CHOICE

Customers deserve choice in their energy supply. We are excited to offer the Clean Energy Choice. East Grand Forks Water and Light's energy supplier, MMPA will provide 1 kWh from its Oak Glen Wind Farm, Hometown BioEnergy, or Hometown Wind to the power grid for each kWh you purchase.

You can purchase renewable sustainable energy for a premium

of just \$0.0175 per kWh for your actual household usage. If you use 750 kWh/month, that's an additional \$13.00 per month on your utility bill. Participation in this program is voluntary and on a month-to-month basis. There are no contracts to sign, and no long-term commitment.

## Clean Energy Choice FAQs

1. *What is the difference between the Clean Energy Choice program and the Green Power Choice program?*
  - a. *The Clean Energy Choice program allows residential customers to buy 100% of their monthly electricity from renewable resources supplied by Oak Glen Wind Farm, Hometown BioEnergy, and Hometown Wind. Participation in this program is voluntary and on a month-to-month basis. The Green Power Choice program allows residential customers to purchase blocks of energy from hydroelectric and wind power sources. Green Power is offered in blocks of 100 kWh and you can choose to purchase any combination of wind or hydro blocks.*
2. *How much does it cost to participate in the Clean Energy Choice program?*
  - a. *The cost of participating in the Clean Energy Choice program is \$0.0175/kWh, depends on your monthly energy usage, and is in addition to your regular electric charges each month. For example, if your monthly usage is 750 kWh, an additional \$13.13 charge would be added to your monthly electric bill. (750 kWh x \$0.0175/kWh = \$13.13)*
3. *How much does it cost to participate in the Green Power Choice program?*
  - a. *The cost of participating in the Green Power Choice program is \$1.75 per 100 kWh block, depends on the number of blocks you purchase, and is in addition to your regular electric charges each month. For example, if you choose to buy 3 blocks (300 kWh) of wind power and 1 block (100 kWh) of hydropower, an additional \$7.00 charge would be added to your monthly electric bill. (4 blocks x \$1.75/block = \$7.00)*
4. *What if I am currently purchasing Green Power and want to participate in the Clean Energy Choice program?*
  - a. *Contact your local utility and tell them you would like to switch to Clean Energy Choice.*
5. *Can I sign up for both Green Power Choice and Clean Energy Choice?*
  - a. *You can only participate in one program.*

\*To sign up for Clean Energy Choice, complete and sign the portion below and return it to the Water and Light office.

**Yes! I choose the Clean Energy Choice.**
