Stormwater Pollution Prevention Program Document

I. Partnerships: (Part II.D.1)

- A. List the **regulated small MS4(s)** with which you have established a partnership in order to satisfy one or more requirements of this Permit. Indicate which Minimum Control Measure (MCM) requirements or other program components that each partnership helps to accomplish (List all that apply). Check the box below if you currently have no established partnerships with other regulated MS4s. If you have more than five partnerships, hit the tab key after the last line to generate a new row.

No partnerships with regulated small MS4s

Name and description of partnership	MCM/Other permit requirements involved

- B. If you have additional information that you would like to communicate about your partnerships with other regulated small MS4(s), provide it in the space below, or include an attachment to the SWPPP Document, with the following file naming convention: *MS4NameHere_Partnerships*.

II. Description of Regulatory Mechanisms: (Part II.D.2)

Illicit discharges

- A. Do you have a regulatory mechanism(s) that effectively prohibits non-stormwater discharges into your small MS4, except those non-stormwater discharges authorized under the Permit (Part III.D.3.b.)? Yes No

1. If yes:

- a. Check which *type* of regulatory mechanism(s) your organization has (check all that apply):

Ordinance Contract language
 Policy/Standards Permits
 Rules
 Other, explain: _____

- b. Provide either a direct link to the mechanism selected above or attach it as an electronic document to this form; or if your regulatory mechanism is either an Ordinance or a Rule, you may provide a citation:

Citation:

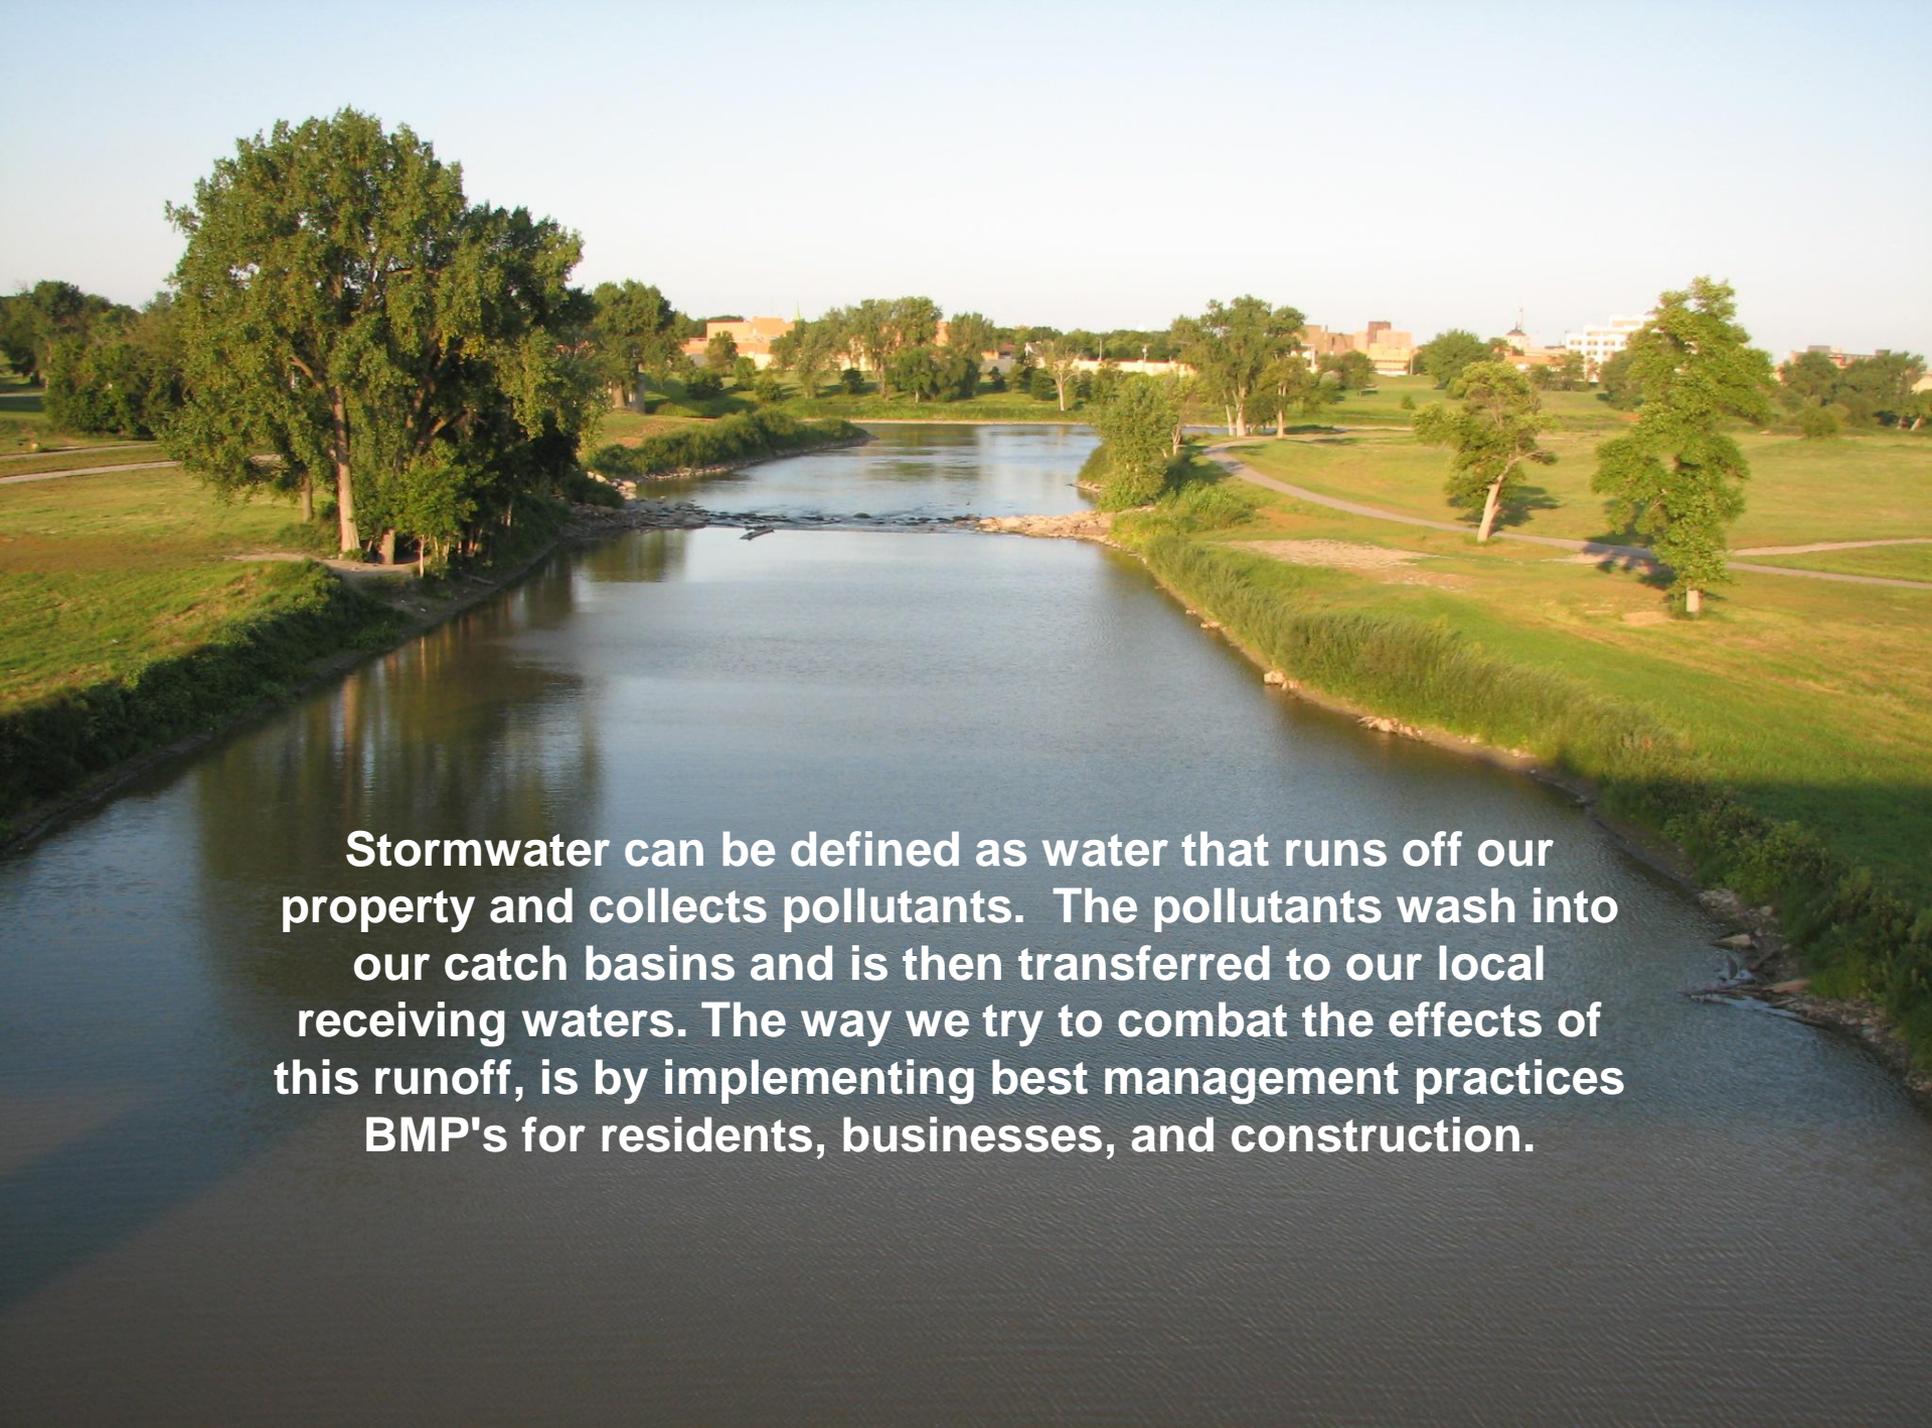

Direct link:

<http://eastgrandforks.us/documentcenter/view/2348>

Check here if attaching an electronic copy of your regulatory mechanism, with the following file naming convention: *MS4NameHere_IDDEreg*.

2. If no:

Describe the tasks and corresponding schedules that will be taken to assure that, within 12 months of the date permit coverage is extended, this permit requirement is met:

A wide, calm river flows through a lush green park. The banks are lined with tall grasses and scattered trees. In the distance, a cluster of buildings is visible under a clear sky. The water reflects the surrounding greenery and the light from the sky.

Stormwater can be defined as water that runs off our property and collects pollutants. The pollutants wash into our catch basins and is then transferred to our local receiving waters. The way we try to combat the effects of this runoff, is by implementing best management practices BMP's for residents, businesses, and construction.

The City of East Grand Forks Storm Water Pollution Prevention Program (SWPPP) is designed to reduce the discharge of pollutants into the Red River of the North and The Red Lake River by educating the local community. The SWPPP program is mandated under the Clean Water Act by the Minnesota Pollution Control Agency and the Environmental Protection Agency, Small Municipal Separate Storm Sewer Systems Permit (MS4) National Pollutant Discharge Elimination System (NPDES).

Stormwater

Purpose

This website was created to inform our community about the effects of stormwater pollution and how to help prevent discharges into our local receiving waters.

Definition

Stormwater can be defined as water that runs off our property and collects pollutants that wash into our catch basins. The polluted water is then transferred to our local receiving waters.

Activities

The way we try to combat the effects of storm water runoff is by implementing best management practices (BMPs) for residents, businesses, and construction. You can find BMPs and educational material on this website:

Please help our community control storm water pollution.
